

Mathematics Pre A Level Summer Work

You will need to log on to the MyMaths website at www.mymaths.co.uk. The user name is vesey and password is circle. In the blue 'My portal' section at the top right hand side you will then need to log in as yourself using the username and password provided for you in your induction pack. There are 6 online worksheets for you to complete on the following topics:

Algebraic Fractions

Quadratics

Number

Manipulating Algebra

Simultaneous Equations

Inequalities

Make sure that you 'checkout' at the end of each worksheet so that your work is marked and your result saved. If your result does not get saved you will be deemed as having not completed the work. You may attempt each worksheet as many times as necessary. You should be aiming to achieve at least 80% on each worksheet. Any working out should be clearly set out on paper - your Maths teacher in the Lower Sixth may ask to see this work.

If you are unsure about any of this work there are revision lessons available on the website. Go to Booster Packs on the home page (left hand side), then A2Astar and click on the relevant topic.
